Audiometry Screening and Assessment Program

Incorporating Accredited Units

HLTAUD001 Assess hearing
HLTAUD002 Conduct play audiometry
AEHPAH002A Promote and Manage Aural Health

This training is not for pre-employment hearing tests.

Fully Funded positions are currently available for this program.
On behalf of The Benchmarque Group, I am delighted to introduce you to our Audiometry Screening and Assessment Program.

The Nationally Accredited program incorporates the delivery of a four units of competency. Three of the units included in this program are from the Audiometry Skills Set included in the National Health Training Package.

By packaging and contextualising individual units of competency, we are able to develop and deliver a program to meet the specific needs of students who will be conducting comprehensive Audiometry Screening and Assessment as part of their clinical role.

This program is designed to offer a broad range of skills and knowledge while being more accessible for all participants studying throughout the country, particularly those in regional, rural or remote settings.

The fundamental goal of ear health and audiometry screening programs in children is to identify children most likely to have hearing loss that can effect their communication, their development, general health and ability to effectively manage education.

The need to develop skills to manage this process in great demand in regional settings as access to Audiometrists can be limited. Having the skills to identify patients at risk of hearing impairment and refer them effectively for care them may assist them to avoid educational, vocational and social issues in the future.

The Audiometry Screening and Assessment Program is evidence based, skills focused and nationally accredited, providing successful participants with the opportunity to gain a qualification that can be added immediately to their scope of practice.

If you have any further questions about the Audiometry Screening and Assessment Program please do not hesitate to contact any one of our team on 1300 855 568.

Kind regards,
The Benchmarque Group Pty Limited

Drew Sutherland

Audiometry Screening and Assessment Program

Course Outline

The Audiometry Screening and Assessment Program is designed to develop the knowledge and skills required for clinicians to safely assess and screen the aural health of individuals and groups.

- The ability for all health professionals to conduct a comprehensive and structured ear health assessment should be regarded as a fundamental and required clinical skill.

A comprehensive ear health assessment should be a systematic and structured process that includes history taking (asking), physical examination (looking) and documentation and referral (recording).

On the successful completion of the program, students should have:

- A comprehensive knowledge and understanding of the anatomy and physiology of the auditory system
- The skills and knowledge to identify a range of conditions of the auditory system
- Be able to perform an ear health examination
- The ability to apply a broad knowledge of management strategies, client centred education and related physical functions to health promotion and provision of basic care and advice in relation to audiometry screening
- The ability to ensure information, including required forms are accessible and available
- The ability to follow all necessary personal hygiene and infection control requirements
- Check equipment for use
- Perform Otoscopy
- Perform Tympanometry
- Perform Audiometry
- Identify contra indications to proceed with hearing assessment
- Outline any follow up required and make appropriate specialist referrals as needed
- Document the examination findings, procedure and outcome in the patient’s history.

$1,295.00 per Student (Inc GST)
A minimum of 10 Students for onsite delivery

Audiometry Screening and Assessment Program

The Benchmarque Group are delighted to be offering the Audiometry Screening and Assessment Program in partnership with Central Coast Hearing.

Central Coast Hearing

Central Coast Hearing is a private audiometry practice located on the Central Coast of New South Wales with a clear focus on issues such as early detection and intervention of middle ear disease such as Otitis Media (Glue ear) ensuring rapid referral and medical treatment.

In addition, Central Coast Hearing offer services related to ear irrigation and ear wax removal, ear plugs and custom fit hearing moulds for professionals such as musicians and security guards and pre employment industrial hearing screening service for employees and local business. We provide diagnostic and screening hearing tests for children from age 5 years to adult.

Central Coast Hearing is committed to providing exceptional service from the initial screening for hearing loss to a full examination. Early screening and detection provides patients with a baseline hearing level while a full examination will pinpoint the effects your hearing loss has on speech and overall communication.

Central Coast Hearing is here to service the community! Hearing day-to-day sounds clearly, is an essential part of everyone’s health, well being and overall happiness. In fact, the quality of your hearing has a direct impact on the quality of your life.

The Benchmarque Group are delighted to Introduce Gordon Rutter, Specialist Program Facilitator for the Audiometry Screening and Assessment Program.

Gordon is a qualified Audiometrist, and Director of Central Coast Hearing and has many years experience in the ear health sector including work with the Royal Institute for Deaf and Blind Children, Awabakal Aboriginal Medical Service, Royal Far West and the Hear our Heart (HOH) Ear Bus Project.

Gordon has a strong background and passion for professional development, education and training in the ear health sector and has worked closely with the Benchmarque Group to develop the Audiometry Screening and Assessment Program. Gordon is currently engaged as a specialist facilitator with The Benchmarque Group and thrives on the challenge of delivering complex clinical information to students in the classroom.
